Model **N**

Model N's Managed Testing Service

Model N's Managed Service provides support for upgrades, change requests, RPS and customizations.

Key capabilities

- Detailed readouts of test results
- Consistent change management testing across the subscription's lifecycle

Benefits

- Stay current with access for change management, requirements mapping, and documentation assistance
- Understand what is new and what is coming next
- Ensure scripts are up-to-date for data quality and testing
- Ensure complete testing coverage with reloaded production data into RTS environments
