

Optimize revenue and ensure compliance as Medicaid evolves

A flexible and scalable SaaS solution, Model N Medicaid enables you to efficiently comply with all government rebate calculation and reporting requirements, operationalize the end-to-end Medicaid rebate process, and access key insights to drive strategic decisions.

Accurate unit rebate calculation

Automate the quarterly unit rebate amount (URA) calculation by leveraging the average manufacturer price (AMP) and best price (BP). Access 50 preloaded formulas and create custom formulas for new calculations, state programs, or supplemental programs.

Efficient claims processing

Perform validation tests on submitted claims to identify outliers and invalid units. Easily generate the required Reconciliation of State Invoice (ROSI) and Prior Quarter Adjustment Statement (PQAS) reports, as well as a consolidated payment package.

Compliant with government regulations

Stay up to date with Regulatory Update Packs (RUPs). Each RUP contains the necessary software and documentation required to comply with new requirements, including Medicaid Drug Rebate Program (MDRP) file formats or updates to the URA calculation.

Boost your Medicaid solution

Model N offers add-on applications to help you address your organization's specific Medicaid requirements.

- **Medicaid Invoice Retrieval** – Automatically retrieve invoices and claim-level detail files from state Medicaid portals and email channels for faster, more accurate rebate processing.
- **Validata** – Identify duplicate line items, ineligible products, and missing data.

Let Model N handle Medicaid on your behalf

Model N Revenue Management Services combines industry expertise, proven processes, and our purpose-built technology in one end-to-end solution. We take care of everything – formula management, rebate calculation, claims validation, and report generation – so you can focus on strategic initiatives.

Reduce risk of non-compliance

- ✓ Manage and process payments from one platform.
- ✓ Streamline processing to avoid penalties.
- ✓ Automate validations.
- ✓ Easily produce consolidated payment packages.
- ✓ Maintain an audit trail.

Ensure accurate, timely Medicaid claims processing
